

A great communication system with the residents with amazing capabilities in Whatsapp powered by **KATOIKOS.CY**

01

Send SMS, Email, Whatsapp and voice messages to the residents.
Available in English, Russian and Greek.

02

See how many residents have actually read the message.

03

Filter the residents by gender, neighborhood, interests, age and more. Deliver really relevant and useful information.

04

Send any type of media including: documents, images, Excel, videos and more.

05

Message multiple whatsapp groups at once. Manage one dynamic link with a stack of groups with no participants limit.

06

Deliver automatic Whatsapp ChatBot messages such as personal birthday greetings.

07

Manage administrator privileges to control who can send and who can approve the messages.

08

Use a dedicated landing page that lets the residents choose their own preference of interests for amazing future targeting.

The system has a great reputation and works in many authorities in Israel including the biggest cities. It is able to send messages to thousands of residents simultaneously and quickly.
